	Systems of Record	Shows how data moves between two systems or services. It may skip over intermediate steps that aren't essential for understanding this diagram.		Flows within or between data warehouse systems
	Medicare Payment System Modernization (MPSM)			Outbound feed from System of Record/ Processing system into data warehouse
	Data Warehouses	Claims Submission Flow: The transmission of adjudicated Medicare claims from shared processing systems (MCS, FISS, VMS, MAP) into CWF for final validation and record-keeping.		Flows within or between data warehouse systems
	DASG Ecosystem			Represents the flow of data from a system, component or service using the FHIR standard format.
	Sources of truth (Includes CMMI and Office of Technology)	Shows how data moves from the "Systems of record" for a specific domain or function		
	Health Entities			
	System, component or service			

4i → 4innovation system	DDPS → Drug Data Processing System
837I → Standard format used for Institutional claims	DPC → Data at the Point of Care API
837P → Standard format used for Professional claims	FHIR → Fast Healthcare Interoperability Resources standard
AB2D → Claims Data to Part D Sponsors API	FISS → Fiscal Intermediary Shared System
ACO → Accountable Care Organization	gRPC → Google Remote Procedure Call
ACO MS → ACO Management System	HPMS → Health Plan Management System
API → Application Programming Interface	JSON → JavaScript Object Notation
BCDA → Beneficiary Claims Data API	MCS → Multi Carrier System
BFD → Beneficiary FHIR Data server	NGD → Next Generation Desktop
CCEM → Combined Common Edits/Enhancements Module	PDP → Prescription Drug Plan (Medicare Part D)
CCLF → Claim and Claim Line Feed	R4 → Release 4 of the FHIR standard
CCW → Chronic Conditions Warehouse	RDA → Replicated Data Access API
CEDI → Common Electronic Data Interchange	STU3 → Standard for Trial Use version 3 of the FHIR standard
CME → Common Medicare Environment	EFT → Enterprise File Transfer
CWF → Common Working File	
DCE → Direct Contracting Entity	
DDE → Direct Data Entry
